

Diploma of Advanced Orthopedic Manual Physical Therapy (IFOMPT Philippine Program)

OMPTSG is a recognized provider of the Philippine Association of Orthopedic Manual Physical Therapists

Greetings and thank you for your interest in the Orthopedic Manual Physical Therapy Specialist Group (OMPTSG) Diploma Program of Advanced Orthopaedic Manual Physical Therapy!

The clinical diploma (fellowship) training represents the highest level of formal clinical training available in the orthopedic manual physical therapy profession.

The three-year post-professional clinical training program in the subspecialty area of practice known as orthopedic manual physical therapy (OMPT) takes place in the Cebu and Manila venues along with virtual courses.

The trainees will undergo intensive mentorship with world class Fellows of the American Academy of Orthopaedic Manual Physical Therapists (AAOMPT), resulting in a high-level of clinical reasoning and psychomotor skill in OMPT. Didactics will be taught by advanced clinicians who are Fellows of American OMPT Academy.

Candidates who successfully complete all requirements will be inducted as a Fellow of PAOMPT (FPAOMPT), a designation that represents advanced, specialized practice in the Philippines.

Physical therapists with clinical fellowship training will be equipped with skills in clinical care, teaching, research, administration, and leadership.

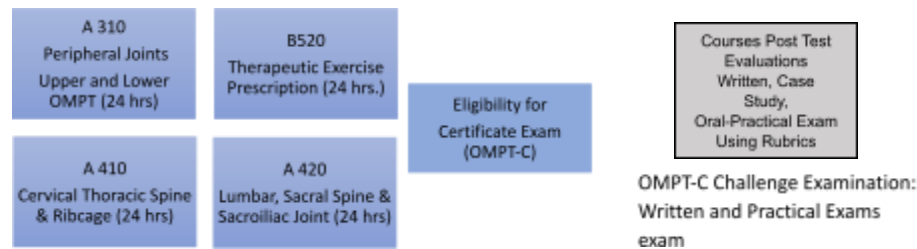

If you have a true passion for a greater level of clinical expertise in OMPT and seek an accelerated path to a wide variety of career opportunities within the PT profession, please consider applying to this program.
